

ABOUT US

QB UP Cloud was established by a team of passionate experts with an aim to provide the finest IT infrastructure and solutions to the world. As professionals, our objective is to offer the most reliable services in the domain of datacenter and cloud-based solutions to our clients. We have collaborated with several datacenters having international footprints to ensure complete data security and prompt assistance. Our commitment towards customer satisfaction and innovation has helped us climb the ladder of success and become one of the fastest-growing technology solution providers of today.

Our impeccable cloud solutions deliver splendid user experiences that are rich, instant, and supported by unmatched customer service & 24/7 monitoring. We believe in helping our clients and their businesses gain a competitive edge that allows them to accelerate their processes and improve their efficiency levels. From delivering timely solutions to taking care of all their IT needs, our team puts their best foot forward in ensuring the data center facility of our clients runs hassle-free.

We have a team of knowledgeable and experienced specialists that works hard to understand the goals of every organization and offers customized hosting solutions accordingly. Currently, we own and operate an advanced certified tier III hosted data center facility in Noida which is well-equipped with state-of-the-art hardware that allows us to deliver exemplary cloud hosting and data center solutions.

OUR PRODUCTS

QB on Cloud

Unlock the full potential of your favorite accounting software and access it in multi-user mode from anywhere in the world. With QB on Cloud, you can get more done in less time thanks to our fast, reliable, and scalable servers. Enjoy all of the benefits and features of a fully supported desktop solution with our competitive pricing and 24/7 technical support.

Sage on Cloud

Move your Sage applications to our multi-user, highly efficient cloud environment to attain a wide range of benefits. Sage on Cloud presents a fully-functional desktop version of the Sage software with its own interface and functionalities. It allows accounting experts and business owners to manage their finances as well as valued clients anytime, anywhere.

QB Remote App

Connecting to your remote server and working from home has never been easier. QB Remote App allows you to access your server and business applications from anywhere and make the most of functionalities like remote desktop access, all-device compatibility, unmatched security, great user experience, and unrestricted concurrent licenses policy.

QB Advance Security

Keep your remote access servers safe and protected with QB Advance Security. It controls your remote access server security and ensures that your network is a safe environment to work at. Additionally, it protects your data from external sources and offers features like Ransomware Security, Brute-Force Protector, Working Hours Regulation, and more!

Tally on Cloud

Take advantage of our state-of-the-art cloud infrastructure with our Tally on cloud service. Not only will you ensure the security of your data but also experience the other unique benefits of this technology, once we set up your accounting software on the cloud. These benefits include much lower costs, the ability to access data from any corner of the world, and automatic data backups.

Other

QB UP Cloud can also help set up other types of taxation or accounting software like:

- Computax
- Marg
- Busy
- Etc.
