

ABOUT US

DHS UP Cloud was founded by a group of professionals geared toward providing highly innovative IT infrastructure and services to users. As specialists, our focus is on delivering dependable services and cloud-based solutions to our clients. We have worked together with many data centers having a wide presence in order to ensure thorough information security and prompt assistance. Our dedication to provide topnotch services and ensure client satisfaction has spurred the growth of our business, thereby enabling us to join the ranks of the fastest progressing service providers in these times.

Our innovative hosting and cloud solutions render superb user experiences that are backed by unrivalled customer service & round-the-clock supervision. We focus on assisting our clients and helping their businesses push forward and surpass the competition, thanks to an improved productivity and faster processes. Whether it's the timely delivery of IT solutions or maintaining those services, our team strives to ensure every service runs without any interruptions.

We have a team of experienced and competent professionals that focuses on understanding the goals of each client organization and provides hosting solutions that meet those goals. At present, we own and maintain an advanced certified tier III hosted data center facility in Noida that is well-resourced and contains all the modern facilities and technologies that help us deliver outstanding cloud hosting and data center solutions.
